

BFM® fitting connectors now have blue cuffs!

BFM® fitting has made an exciting new change to our connectors. They look very different, but the important bits are the same.

All of our Seeflex connectors now have beautiful new-look BFM® blue cuffs. They also have a distinctive BFM® blue 'stamp' at the top-front of the connector body.

Now you'll be able to immediately see if it's a genuine BFM® fitting product!

You can rest assured that our flexible, snap-fit cuffs are made of exactly the same material as they always have been - it's only the colour that's changed.

We want to make sure your questions are covered, so please go to: www.bfmfitting.com/bfm-fitting-has-gone-blue to learn more about this change.
